

Tools for Reproducible Research

Week 8 Homework

1. Turn the R code you wrote in the [previous homework](#) into an R package, with documentation and with a very short vignette. Get it to pass `R CMD check`.
2. Put it in a GitHub repository.
3. Email the URL for the GitHub repository to Karl (kbroman@biostat.wisc.edu).
4. If you made it a private GitHub repository, give Karl access to it.
 - Go to the GitHub repository and click “Settings” on the right.
 - Click “Collaborators” on the left.
 - Search for Karl’s GitHub ID ([kbroman](#)) and click “Add collaborator”.
